Artificial Intelligence

AI_A1_G14 contribution and accountability record

Signed mapping of requirements to members · Group AI-G14

Document detail	Content
Group code	AI-G14
Group leader	Teta Erssie
Dataset	data/AI_A1_G14.csv (lecturer-issued; not renamed or replaced)
Related files	AI_A1_G14.zip, AI_A1_G14_UIUX.pdf, evidence/AI_USE.md

Role mapping

Role	Student	Primary files	Requirement owned
Member 5 Reproducibility	Teta Erssie	run_all.py, predict.py, README.md, requirements.txt, evidence packaging	CLI contract, clean run, final hash, predict validation
Member 1 Data and UX	Joel Eliezer Youto Mongar Jr	src/data.py, AI_A1_G14_UIUX.pdf	Schema, vectorization, data report, dashboard PDF
Member 2 Regression	Niyibigira Gad	src/regression.py, evidence/REG RESSION_DERIVATION.md	NumPy gradient descent, scaling, loss, MAE/RMSE/R ²
Member 3 Classification	Uwiringiyimana Marie Claire	src/classification.py, confusion_matrix.png	Split, metrics, confusion matrix, cost of false negatives
Member 4 Clustering and QA	Mbabazi Sandrine	src/clustering.py, evidence/TEST_LOG.pdf	k = 2 to 5, silhouette, labels, test log

Each member must make at least two meaningful commits on the owned files and must be able to change seed, learning rate, threshold, or k range in the live check. Cosmetic commits do not count.

Integrity statement

We confirm that the lecturer-issued dataset was not renamed, extended, or replaced; that files inside artifacts/ were generated by the submitted code; and that generative AI use is disclosed in evidence/AI_USE.md. A member who cannot explain the listed files receives zero for individual verification even if the group ZIP runs.

Student	Registration number	Signature	Date	Commit hash (owned work)
Teta Erssie				
Joel Eliezer Youto Mongar Jr				
Niyibigira Gad				
Uwiringiyimana Marie Claire				
Mbabazi Sandrine				

Peer accountability

Confidential peer ratings must be consistent with this mapping and with the Git history. Only the group leader submits on Moodle. The GitHub commit hash entered in Moodle must match the ZIP.
